

Strategic objective/task	Quality target	Indicator	Comment
The fulfillment of the students' minimum study and graduation requirements should be time-proportional	The largest proportion of students participating in organized training should complete the complex exam at the end of the 4th active semester of the study phase	The proportion of students dismissed during the study phase should not exceed 5%.	
	The largest proportion of students participating in the organized training should achieve the absolutorium at the end of the 4th active semester of the dissertation phase.	The proportion of students dismissed during the dissertation phase should not exceed 10%.	
	The largest proportion of doctoral students should receive a degree within 6 active semesters following the complex exam.	The proportion of dismissed students who pass the complex exam but do not receive a degree should not exceed 10%.	
	In the organized training, the control of the student's progress should be ensured continuously, primarily on the basis of semester reports	At least 90% of the students participating in the organized training report on their progress at the semester report.	
	In the training of individual preparers, control of student progress should be ensured primarily based on the feedback of the supervisor-student	At least 90% of the students participating in individual preparation must report their progress in writing together with their supervisor	Individual preparation students are not required to obtain credits
Students must meet their doctoral study, publication and dissertation requirements in an appropriate manner	Strengthening the students' publication background knowledge and research attitude	The subject "Publication standards and requirements" should be a compulsory subject.	

	Support for continuous, high-quality doctoral work	At the semester report, the acceptance rate of student reports must reach at least 90%.	
	Achieving quality study and research results by the time of the complex exam	The complex exam must be successful in at least 95% of the exams.	
		The result of the study part of the complex exam should reach the GOOD rating on average.	
	Preparation of quality publications	The proportion of joint publications with the supervisor should reach 80%	
	Preparation of high-quality doctoral theses	In 90% of the cases, theses should be evaluated at the workshop debate as "recommended for public defense".	
		Public defense should be successful in 95% of cases.	
		The evaluation of the public defense must reach the "summa cum laude" qualification in at least 50% of the cases.	
	Scientific qualification of the public defense committee	In 80% of public defense committees, at least one member should have a DSc title or MTA membership.	According to the regulations, all members must have at least a PhD or CSc degree.
Quality core member, supervisor and educational activities in the doctoral school	Professional level of supervisors and lecturers	In the case of active lecturers and supervisors, the doktori.hu site should be updated at least once a year.	Publication data is updated at least yearly
	Professional level of core members' activity	50% of the core members should produce Q1 publication	In the case of core members, the doktori.hu site should be updated at least once a year.
		On average, core members publish at least one Q2-Q3 journal article per year	In the case of core members, the doktori.hu site should be updated at least once a year.
	Ensuring the number of core members	Admission of at least one core member under the age of 60 within three years.	

Deepening the national and international research integration of the doctoral school	Expansion of partnerships	Establishing partnerships with at least two new research centers within five years.
