

Strategic target/task	Quality target	Indicator	Remark
Students complete their doctoral study, publication and dissertation requirements to a satisfactory standard	Increasing the number of successful defenses	min. 10 successful public defenses	
Quality core membership, supervision and teaching in the doctoral school	Increasing the number of core members and/or DIT members with DSc titles	1 additional person in the 2025-2026 academic year	
	Increase the number of joint supervision with a foreign university	at least 2 new research topics co-led with a foreign university	
Deepening the integration of BDI's domestic and international research	Increasing the number of industrially-based research topics	at least 2 new research topics with an industrial background	
	Increasing the number of EKÖP-KDP students	at least 1 new KDP student	
	Increasing the number of students participating in the Stipendium Hungaricum program	at least 3 new SH students	
Students should meet the minimum academic and degree requirements in a time-proportional manner	As many students as possible participating in organized training should pass the complex exam at the end of the 4th active semester of the study period.	The proportion of students dismissed during the study period should remain below 5%.	
	The largest possible proportion of students participating in organized training should achieve their absolutium by the end of the 4th active semester of the dissertation phase.	The rate of students dismissed during the dissertation phase should remain below 10%.	

	The largest possible proportion of doctoral students should receive their degrees within 6 active semesters following the complex exam.	The proportion of dismissed students who pass the complex exam but do not achieve a degree should remain below 10%.	
	In organized training, student progress should be continuously monitored, primarily based on semester reports.	At least 95% of students participating in organized training should report on their progress in the semi-annual doctoral student report.	
Students must fulfill their doctoral study, publication and dissertation requirements in an appropriate manner	Strengthening students' publication background knowledge and research attitude	The subject "Publication Standards, Knowledge" and the subject "Methodology of Scientific Research" should be mandatory for all students participating in Hungarian-language training in the first semester of the training. The subject "Publication Standards, Knowledge" should be mandatory for first-year students participating in English-language training.	
	Supporting continuous, high-quality doctoral research	The acceptance rate of student reports for the half-yearly doctoral student report should reach at least 95%.	
	Achieving quality academic and research results by the time of the complex exam	A komplex vizsga legyen eredményes az vizsgák legalább 95 %-ában.	
		The average score of the academic part of the complex exam must reach a minimum of 40 points out of a maximum of 45.	
	Production of quality doctoral student publications	The proportion of joint publications with the supervisor should reach 80%.	
	Preparation of high-quality doctoral theses	The evaluation of theses in a workplace discussion should be carried out in 90% of cases. It is rated "PhD recommended for public defense".	

		The public defense should be successful in 95% of cases.	
		The evaluation of the public defense should achieve the "summa cum laude" rating in at least 50% of cases.	
Quality core membership, research topic management and educational activities in the doctoral school	Professional level of supervisors and lecturers	In the case of active lecturers and supervisors, the doktori.hu interface should be updated at least once a year.	Update publication data at least annually
	Professional level of core member activity	In terms of publications, 50% of core members should produce a Q1-rated publication	For core members, the doktori.hu interface should be updated at least once a year.
		DI core members should publish at least one Q2-Q3 rated journal article per year on average	For core members, the doktori.hu interface should be updated at least once a year.
	Ensuring the number of core members	Recruiting at least one core member under the age of 60 within three years.	
Deepening the integration of BDI's domestic and international research	Expanding partnerships	Establish partnerships with at least two new research sites within five years.	

Budapest, September 24, 2024.

Prof. Dr. Tibor J. GODA DSc  
Head of the Doctoral School
